## Workshop enrichment & methodological intersection at the University of Wollongong/University of New South Wales (taking place in M37)

ENRICH AND SHARE METHODOLOGICAL INTERSECTIONS BETWEEN WPS FOR THE SCIENTIFIC VALORISATION OF FALAH PROJECT

### 1. Summary

The document is the synthesis of the seventh FALAH workshop organized by the University of New South Wales (UNSW) and the University of Wollongong (UOW) at Sydney, from 3 to 5 October 2023. Under the title “**Enrich and Share Methodological Intersections between WPs for the Scientific Valorisation of FALAH Project**”, the workshop took place over three days of presentations and workshops in small groups of researchers. The UNSW and UOW workshop were preceded by meetings of preparation and specific exchanges through a public conference given by scientific coordinators to local partners involved in the FALAH program. This 11-pages (and 4-pages appendix) document outlines the work before and during the three days’ workshop. It covers the pre- and post-workshop components and is aimed at project participants and partners.

### 2. General introduction: objectives and preparation of the workshop

#### 2.1. Objectives of the workshop

The first week of October 2023, from the 3rd to the 5th, the FALAH Workshop was held at the University of New South Wales in Sydney on the theme “enriching and sharing methodological intersections between Work packages for the scientific valorization of the project FALAH.” This workshop was mainly related to WP 4: “Knowledge exchange and education”.

The workshop began with a welcoming ceremony, and a welcome speech from **Pr. Eleanor BECK**, director of the School of Health Sciences at the University of New South Wales. **Dr. David SIMAR**, Deputy Director Faculty of Medicine and Health at the University of New South Wales then intervened to present the days of the workshop.

Figure 1: Dr. Olivier GALY (UNC), Pr. Eleanor BEACK (UNSW), Pr. Jean-Marie FOTSING (UNC) and Dr. David SIMAR (UNSW)

During a first session, **Pr. Jean-Marie FOTSING** and **Dr. Olivier GALY** explained the themes of the workshop to the participants with:

Theme 1: scientific valorization of the communications (WP4) from results presented at the first conference in Port Vila and the research work carried out by the teams

Theme 2: how to enrich and share methodological intersections between Work packages for the next FALAH scientific event at the National University of the Solomon Islands (May 2024). Same approach was used for next scientific event at the University of the South Pacific (October 2024) and for the final conference at the University of New Caledonia (March 2025)

Theme 3: projections on the next steps of the FALAH consortium after 2025 (partnerships, themes, funding, etc.) with a focus on methodological intersections build during FALAH that can be the beginning of a new project.

**Mister Nishant SHANDILYA**, regional coordinator at EURAXESS Australia and New Zealand, was specially invited to this workshop to present the financing possibilities of the European Union. He presented the different funding offered by the European Union accessible to universities in the Pacific, Australia and New Zealand.

Figure 2: Pr. Jean-Marie FOTSING (UNC), Mr. Nishant SHANDILYA (EURAXESS) and Dr. Olivier GALY (UNC)

During the 2 days of the workshop, the themes were supervised by researchers from the University of New South Wales and New Caledonia and then worked on with the partners of the FALAH project.

The workshop closed with a summary of the progress made during the two days of work. These advances made it possible to define the broad outlines of the program of workshops at the Solomon Islands National University which will be held from May 14 to 16, 2024, the University of the South Pacific which will take place from October 22 to 24, 2024 as well as the final conference at the University of New-Caledonia scheduled for March 18, 19 and 20, 2025.

Figure 3: FALAH Teams at the UNSW-UOW Workshop

## 2.2. Preparation of the workshop

The preparation started one year before when FALAH teams met at the University of Sydney (USYD) for the first Australian workshop. Between 2022 and 2023, **Dr. Olivier GALY** met teams during his secondments at the UNSW and the USYD to prepare this second scientific event. This was facilitated by actions of Pacific Island University Research Network leader, Ms Mathilde Souchon who was also strongly engaged with **Dr. Charles HAWKSLEY** (UOW) and **Dr. David SIMAR** (UNSW).

## 3. Workshop report

During the workshop, participants alternated between workshops grouping specialists by WP and general presentations. Additional group meetings on current pathways projects complemented the workshop on the third day.

### Groups for the workshop:

- Group 1: **Pr. Jean-Marie FOTSING** (UNC), **Dr. Laurent MAGGIA** (UNC), **Mr. Filipe VEISA** (USP), **Ms. Mathilde SOUCHON** (USP), **Pr. Eveline DÜRR** (Kula e.V), **Dr. Arno PASCHT** (Kula e.V), **Pr. Corinne CAILLAUD** (USYD).
- Group 2: **Dr. Olivier GALY** (UNC), **Ms. Marine MARTINEZ** (UNC), **Dr. Hilda SAKITI-WAQA** (USP), **Dr. John FASI** (SINU), **Pr. Gordon WINDER** (Kula e.V), **Dr. Desiree HETZEL** (Kula e.V), **Dr. David SIMAR** (UNSW).

### 3.1. Opening ceremony

The opening ceremony at the UNSW scientific event took place at the University of New South Wales in Sydney, Australia. Opening words by **Dr. David SIMAR** and **Pr. Eleanor BECK**.

The workshop was organized in alternating presentations and working groups followed by exchanges on:

Thematic 1: Scientific valorisation: conferences and research work

Thematic 2: Build scientific program for next FALAH events

- May 2024 Workshop - Solomon Islands National University
- October 2024 Workshop - University of South Pacific
- 2024 - Papua New Guinea conference
- March 2025 – Final conference in Noumea

Thematic 3: Forthcoming steps for FALAH consortium after 2025 (partnership, thematic, funds...)

### 3.1. Scientific presentations and communications (Day 1, 2 and 3)

#### 3.1.1. Session 1: Objectives, thematic and organisation of the Workshop – Prof. Jean-Marie FOTSING and Dr. Olivier GALY

During this workshop, thematic and objectives were to “enriching and sharing methodological intersections between Work packages for the scientific valorization of the project FALAH.” To reach these objectives, coordinators presented a workshop including 3 main sessions. The first one focused on the scientific valorization of the communications (WP4) from results presented at the first conference in Port-Vila and the research work carried out by the teams. The second one aimed to work on the enrichment and shared methodological intersections between Work packages for the next FALAH scientific event at the National University of the Solomon Islands (May 2024). Same approach was used for next scientific event at the University of the South Pacific (October 2024) and for the final conference at the University of New-Caledonia (March 2025). Then, the third objective concerned projections on the next steps of the

FALAH consortium after 2025 (partnerships, themes, funding, etc.) with a focus on methodological intersections build during FALAH that can be the beginning of a new project.

### 3.1.2. Session 2: European Union funding opportunities for FALAH consortium

**Mister Nishant SHANDILYA** (Regional Coordinator EURAXESS Australia & New Zealand) presented European Union funding opportunities for Pacific region. This was an important session for participants since EU actions and funding sources are not spontaneously solicited by teams in the Pacific region. Questions were asked around eligibilities of Australian and New Zealand teams since they are not actually funded by EU in FALAH project. **Mr. Nishant SHANDILYA** underlined that in several funding schemes AUS and NZ researchers can benefit to EU funds, while acknowledge that this is not the case for RISE MSCA action. This large presentation helped team to have a projection on future funding sources and possibilities after FALAH project.

Figure 4: EURAXESS Australia & New Zealand post

### 3.1.3. Session 3: Presentation of the methodology – Jean-Marie FOTSING and Olivier GALY

**Professor Jean-Marie FOTSING** and **Dr. Olivier GALY** presented an overview of the different possibilities for promoting scientific work in FALAH and action to do. A guideline for the policy of promoting the team's research work was presented. More particularly, the policy for publishing work based on the principle of Open Access: identification of appropriate editorial guidelines and rules governing co-authorship. For the record, the principle of Open Access is understood as “the free provision of scientific literature on the public Internet, allowing everyone to read, download, copy, transmit, print, search or link to the full text of these articles, dissect them for indexing, use them as data for software, or use them for any other lawful purpose, without financial, legal or technical barriers other than those inseparable from access and use of the Internet. The only constraint on reproduction and distribution, and the only role of

copyright in this area, should be to guarantee authors control over the integrity of their work and the right to be properly recognized and cited. (Budapest Open Access Initiative)” (Source Inist).

Reminders of open access publication was done and considered if it is a publication that meets the following two conditions:

1. The author as well as the copyright holders grant to all users a free, irrevocable, worldwide and perpetual right of access and grant them a license allowing them to copy, use, distribute, transmit and publicly view the work and use this work for the creation and distribution of derivative works, in any electronic format and for any reasonable purpose, provided that the author is correctly identified; they also grant users the right to make a small number of hard copies for their personal use.
2. The complete version of the work, together with any related documents, including a copy of the above permission, made in an appropriate standard electronic format, is deposited upon its initial publication in at least one online repository subsidized by an establishment of higher education, a learned society, a government agency or any other recognized organization working for open access, unrestricted distribution, interoperability, and long-term archiving. (Bethesda Open Access Publishing Statement) (Ibid.).

« This study has been funded by the European Commission through the RISE program (Research and Innovation Staff Exchange) H2020 – MSCA – RISE – 2019 Grant Agreement: 873185: FALAH: “Family farming, lifestyle and health in the Pacific ».

Figure 5: Presentation by Pr. FOTSING (UNC) and Dr. GALY (UNC)

### 3.1.4. Session 4: Schedule of thematic and working groups

This afternoon session was presented by coordinators to and lead by chairman for T1: **Dr. Laurent MAGGIA** (UNC): Scientific valorisation: conferences and research work; for T2: **Prof. Jean-Marie FOTSING** (UNC) Build scientific program for next FALAH events: USP, SINU, NC; for T 3: **Dr. Olivier GALY** (UNC): Forthcoming steps for FALAH consortium after 2025: partnership, thematic, funds.

### 3.1.5. Session 5: Workshop 1 & Workshop 2 - Work on thematic 1 (group 1) and thematic 3 (group 2)

This session was dedicated to work on forthcoming steps for FALAH Consortium and especially on future thematic, the choice of field of research in the Pacific, the possibilities for other institutions to join and funding opportunities, in a first instance related to the intervention of **Mr. Nishant SHANDILYA** - Regional Coordinator EURAXESS Australia & New Zealand. We used padlet application and the two groups were invited to fill it and discuss about choices and priorities. From our discussion, main topics extracted were around: lifestyle, food and health with a continuum of the four main fields: Fiji, Vanuatu, Solomon Islands and New-Caledonia. Of course, new institutions are welcome to support and participate to the next steps.

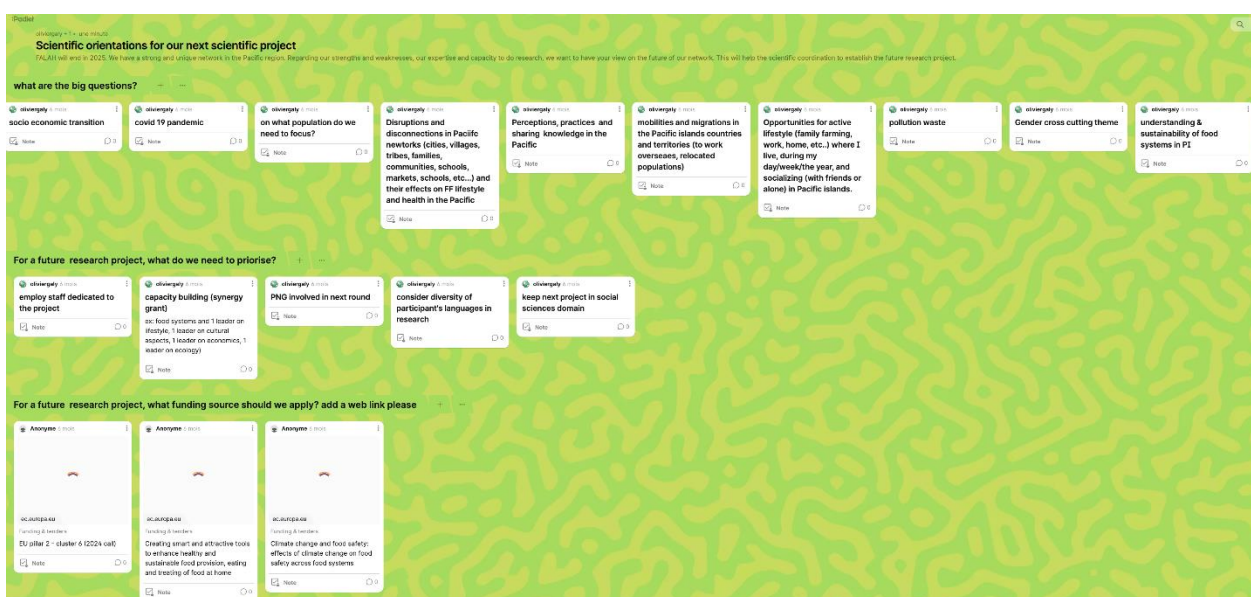

Figure 6: Illustration for one padlet on scientific orientations for FALAH consortium next project

Figures 7 and 8: Groups at work on the different thematic

### 3.1.6. Session 6: Workshop 3 & Workshop 4 - Work on thematic 1 (group 2) and thematic 3 (group 1)

Conclusions from this group were to edit a book at the end of the project in order to set recommendations based on research results and bring support for policies in different Pacific countries. Another aspect concerned Pacific islands forum where a meeting, could be proposed in o leaders of the forum in 2024/2025. Pacific has a strong impact on public policies of Pacific countries and bring FALAH results to this organisation would have a strong impact as discussed during this session.

### 3.1.7. Session 7: Workshop 5 & Workshop 6 - Work on thematic 2

The morning sessions were dedicated to work on the SINU and the USP Workshops based on the enrichment & methodological intersection that we built since the beginning of FALAH project. After a short presentation of the objectives of the session by the coordination team, groups were built around these two future scientific events and exchanges were done in a second time.

Figure 9: Dr. Olivier GALY presentation of the program

Figure 10: Working in teams

Figure 11: Working with the SINU team

Figure 12: Working with the USP team

### 3.1.8. Session 8: Workshop 7 & Workshop 8 - Work on thematic 2

The afternoon of the workshop was dedicated to work on the enrichment and methodological intersections that can be presented for the final FALAH conference in March 2025. A first preprogram was presented to the participants and was amended and completed.

During the synthesis of the different thematic, each representative of the hosting institution (SINU, USP and UNC) for the following event presented a provisional program with the institutional representative for the welcoming ceremony, the type of presentation they would like to have and the presentation of the field trip. Then, the workshop ended by a dinner with all the participants near the University of New South Wales.

Figure 13 and 14: Preparation of the conference and restitutions at the end of Day 2

### 3.1.9. Session 9: Complementary session

Some participants of the workshop joined the 5th of October for side session to work especially on:

- 1) their future secondments with administrative coordinators
- 2) on the CHANCES-Pacific project (EU funded). Indeed, this grant was obtained in the umbrella of FALAH consortium where SINU, USP, USYD, NUV, MoET, IAC and UNC teams are involved.

Title: “Climate cHAnge and the futures of Coastal communitiES: transformation of socialty, livelihoods and lifestyle in the South PaACIFIC: CHANCES PACIFIC”.

Abstract: The Pacific Islands Countries and Territories (PICTs) are particularly vulnerable to the impacts of climate change and are already experiencing sea level rise and coastal vulnerability, which severely impact communities’ livelihoods and lifestyles. In particular, food security, diets and health are severely affected by these climate change induced changes. Because of this, it is essential to consider the role and importance of local food production, especially family farming, because it can contribute to an improvement of this situation. Therefore, CHANCE-Pacific project will create 6 living labs and investigate communities experiencing sea level rise and coastal vulnerability in interrelation with food security, family farming and health, in three countries: Fiji, Solomon Islands and Vanuatu.

Figure 15: Ms. Mathilde SOUCHON (USP)

## 4. Conclusion

This workshop permitted to members of the consortium to move forward on important steps such as enrichment and methodological intersection between the WP2, WP3 and WP4. Concrete actions will be the setup of CHANCES Pacific project which will permit to enlarge teams in Fiji, Van, and Solomon Islands to work on WP2, WP3 and WP4 by the realisation of living labs. The content of next scientific FALAH events is now settled and perspectives for next steps after FALAH project have been discussed with the consortium.

## 5. Communication on the workshop

All communications on this seminar were made through the usual communication channels of the H2020 RISE-FALAH 873185 project including Facebook, FALAG website.

Concerning FALAH Website information's were given here: <https://falah.unc.nc/fr/node/191>

Concerning Facebook and Twitter, FALAH accounts permit us to get 1044 and 231 impressions respectively (Table 1 and 2 below). Between September and October 2023. This communication ensures social media communication before, during and after the event.
